

BRS Reconciliation — Questions for Manual Preparer

Client: Lordship Insurance Company Limited | **Bank:** Ecobank Tesano Account 1441001519033 (9033)

Period: Q1 2026 | **Reconciliation date:** 31 March 2026

Reference workbook: Account901 brs as at 31.3.2026.xlsx

Prepared by: KQ Soft Solutions | **Date:** 6 June 2026

Status — platform vs your manual BRS

Bank closing balance	18,643.29 — Match
Cash book balance	378,557.29 — Match
Uncredited lodgments	0.00 — Match
Bank-only credits	3,479.73 — Match
Unpresented cheques (BRS line)	Manual 10,660.97 vs Platform 19,754.86
Bank-only debits (BRS line)	Manual 374,054.70 vs Platform 393,412.21

We believe the remaining gaps relate to **netting steps and matching judgment** in your workbook that our system does not yet automate. Your answers below will help us align the platform with your process.

We have uploaded the same source files you used: **LIBcashbk1 2026 1qtr.xlsx** (cash book) and **1778163944552 dated 4.6.26.xlsx** (bank statement). Please reply with confirmations, corrections, and pairing details where requested.

1. How did you arrive at 10,660.97 for unpresented cheques?

On Sheet1 of your workbook we see these sections and totals:

Section	Total (GHS)
Unpresented cheques (4 rows: 926073, 926072, 926023, 925928)	8,000.26
Unmatched payments in cash book — block 1	26,750.80
Unmatched debits in bank statement — block 1	-17,875.20
Subtotal	16,875.86
Unmatched debits in bank statement — block 2	21,429.78
Unmatched payments in cash book — block 2 (contra / negative)	-15,214.89
Round 2 net offset	6,214.89

Our reading: $\text{BRS unpresented} = 16,875.86 - 6,214.89 = 10,660.97$

1. Is this the correct formula for the “**Less: Unpresented cheques**” line on the main BRS?
2. Or do you use a different method (for example, only the 4-row section totalling 8,000.26)?
3. What is the amount **1,767.43** shown on row 74? How does it tie to the bank closing balance of 18,643.29?

2. Round 1 netting — payments matched to bank debits (block 1)

Block 1 bank debits total **–17,875.20** and appear to offset these payments:

Cash book chq	Amount	Bank side (summary)
925976	5,000.00	Withdrawal — chq 925976
926102	5,000.00	Withdrawal — chq 926102
926059	5,000.00	Withdrawal — chq 926059
925975	975.20	Clearing — chq 925975
925881	950.00	Clearing — chq 925881
925973	950.00	Clearing — chq 925973

- Are these **one-to-one pairings** (each payment matched to that specific bank line)?
- For **925973** — which cash book payment does it pair with? We see 925881 (950) in the payment list but not 925973.
- After this round, which items from block 1 (e.g. Samuel Narh **926101**, Skones **926105**, Royal Adjei **926075**) remain as timing items versus fully netted away?

3. Round 2 netting — contra (negative) payment entries

Block 2 shows these **negative** payment amounts totalling **–15,214.89**:

Cash book chq	Amount shown	Payee
926042	–3,214.89	SSNIT
925987	–3,000.00	Philip akuffo
926113	–3,000.00	Philip Akuffo
926069	–3,000.00	Philip Akuffo
925945	–3,000.00	(blank)

Against bank debits block 2 total of **21,429.78** (net offset **6,214.89**).

- Why are these payments shown as **negative**? Are they explicit offsets to specific bank debits in block 2?
- Please list the **exact bank line** each contra payment pairs with (date, description, amount).
- Is **926042** (SSNIT) paired to clearing 926042 on the bank, or to a different bank line?

4. Cross–cheque matches (different chq on cash book vs bank)

These are **matched in your Sheet4** but the cheque numbers differ between cash book and bank:

Cash book chq	Payee	Amount	Bank line you matched to
926044	GRA (PAYE Dec 25)	2,981.81	<i>Please specify</i>
926092	GRA (PAYE Jan 26)	2,981.81	<i>Please specify</i>
926062	Doris Quayson (Mar 26)	2,500.00	<i>Please specify — HSE 926118?</i>

10. For each row above, which **exact bank transaction** did you match to (date + description)?
11. What rule did you use — **amount + payee name** (GRA, Doris), **amount only**, or something else?
12. Can several cash book cheques legitimately match **one** HSE deposit line on the bank?

5. Utilities — no cheque number on bank statement

Matched in your Sheet4 but the bank statement has **no line containing that cheque number**:

Cash book chq	Payee	Amount	Bank line you matched to
925981	VODAFONE	700.00	<i>Please specify</i>
926109	Vodafone Ghana	700.00	<i>Please specify</i>

13. Which **bank transaction(s)** did you match each payment to (date, description, amount)?
14. Was the match by **amount (700)** only, by **payee name** in the bank narrative, or another rule?

6. Incomplete bank row — chq 926114

In the bank Excel export we have a row with **description only**:

“CHQ NO 926114 received from Clearing” — no transaction date and no amount.

Your cash book shows **Sodium Brand Solutions**, chq **926114**, amount **2,244.00**, matched in Sheet4.

15. What **date and amount** did you use for this bank line?
16. Was it taken from the PDF, another export, or entered manually?

7. Treatment of remaining cheques

Please confirm how **you** treated each item on the BRS (Unpresented / Matched / Netted in worksheet):

Chq	Payee	Amount	Your treatment
926101	Samuel Narh	950.00	
926058	Samuel Narh	950.00	
926105	Skones Security	975.20	
926061	Skones Security	975.20	

Chq	Payee	Amount	Your treatment
925942	Skones (Dec 25)	975.20	
926057	Rita Korkoi Mensah	785.00	
926073	ECG	4,839.56	
926072	Server repairs	650.00	
926023	Alex Avorkpo	510.70	
925928	(blank)	2,000.00	

17. For each row in the table, which category applies?
18. Are the **four cheques totalling 8,000.26** (926073, 926072, 926023, 925928) the only true unpresented cheques on the BRS line after all netting?

8. Bank-only debits schedule (374,054.70)

19. Does the total **374,054.70** include inward clearing / HSE deposit lines that you have **already matched** to cash book payments elsewhere on the worksheet?
20. Once a clearing credit is matched to a payment, is it **removed** from the bank-only debits schedule?
21. Are **FT Consolidation for SDMC** lines always treated as bank-only (never recorded in the cash book)?

9. Match count (~54 manual vs 44 automated)

22. Are the roughly **10 extra pairs** in your workbook mostly the cross-chq, utility, and judgment cases described above?
23. Is there a list of matches you consider **manual only** that you would not expect a system to auto-match?

What we need back

1. Confirmation or correction of the **unpresented formula** (Section 1).
2. **Pairing tables** for Sections 2–6 (cash book row ↔ bank row).
3. **Treatment** for each cheque in Section 7.
4. Short answers on **bank-only debits** rules (Section 8).

With your replies we can replicate your workbook logic in our platform or document acceptable differences between manual judgment and automated rules.
